

ListaCanciones::eliminar
Cancion

ListaCanciones::listarCanciones

ListaCanciones::modificar

Cancion::getNombre

```
graph LR; A[ListaCanciones::eliminar<br/>Cancion] --> D[Cancion::getNombre]; B[ListaCanciones::listarCanciones] --> D; C[ListaCanciones::modificar] --> D;
```

The diagram illustrates a dependency or call relationship. On the left, three rectangular boxes represent methods from the 'ListaCanciones' class: 'eliminar Cancion', 'listarCanciones', and 'modificar'. On the right, a shaded rectangular box represents the 'getNombre' method of the 'Cancion' class. Three blue arrows originate from the right side of each 'ListaCanciones' method box and point towards the 'Cancion::getNombre' box, indicating that each of these methods calls or depends on the 'getNombre' method.
